Enabling Workgroup share
Windows 7 and Mede8er v2.02

1. Open Control Panel then select Network and Internet

2. Select change advanced sharing settings
Select options as per the screen-shot below

After selection click apply changes tab
SET DRIVE SECURITY

Firstly check the Drive that contains the Folder in that you intend to share.

Right click

Click the “Security” tab and check that “Users” are on the security list. If “Users” are on the list then select “Cancel” and go the folder sharing point 10. If “Users” are not on the list then go to point 6 and select the “Add” tab.
Win7 will check the names and display the result. Your result should look like this:

PCNAME XXX\Users

Select "Apply"
Right click the folder you want to share. Place your cursor over the "Share With" text and then select "Specific People".

Type "everyone" in the text input panel and then click "Add".
a. Make sure the Mede8er is connected to your network.
b. Go to Media Library 1
c. Select Network
d. Select Workgroup
e. Select the PC you want to stream from
f. Select the shared folder
